Person—primary disability group

Identifying and definitional attributes

Metadata item type:	Data Element Concept
METEOR identifier:	680775
Registration status:	Disability , Standard 15/12/2017
Definition:	A person's impairment of body structure or function, limitation in activity, or restriction in participation that is chiefly responsible for the disability.

Object Class attributes

Identifying and definitional attributes

Object class:	Person
Definition:	A human being.

Collection and usage attributes

Comments:	Prior to 13 March 2018, the definition of the 'Person' Object class was 'A human being, whether man, woman or child'. From 13 March 2018, the definition was edited by removing the words '...whether man, woman or child' so that a person is defined as 'A human being'. This amendment was undertaken to align the definition of a person with the <i>Australian Government Guidelines on the Recognition of Sex and Gender</i> and the Australian Bureau of Statistics (ABS) <i>Standard for Sex and Gender Variables</i> , which recognise that there are sex and gender types that are not exclusively male or female.
