

Public hospital service research activities cluster

Identifying and definitional attributes

Metadata item type: Data Set Specification

METEOR identifier: 680885

Registration status:

- [Health](#), Superseded 05/02/2021
- [Independent Hospital Pricing Authority](#), Standard 27/11/2017

DSS type: Data Element Cluster

Scope: The Public hospital service research activities cluster describes information relating to the research infrastructure, capability and activity within a public hospital service.

Research refers to the activities undertaken in a public health service where the primary objective is the advancement of knowledge that ultimately aims to improve consumer and patient health outcomes and/or health system performance. The activity must be undertaken in a structured and ethical way, be formally approved by a research governance or ethics body, and have potential for application outside of the health service in which the activity is undertaken.

For [activity based funding](#) purposes, the definition of research relates to the public health service's contribution to maintain research capability, excluding the costs of research activities that are funded from a source other than the state or territory or provided in kind.

Collection and usage attributes

Guide for use: The Public hospital service research activities cluster comprises three data elements that provide information on the number of full-time equivalent [research directorate](#) staff, number of peer reviewed articles published and number of approved research projects.
