Emergency department stay—physical departure time, hhmm

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Emergency department physical departure time
METEOR identifier:	684600
Registration status:	Health , Superseded 20/10/2021 Tasmanian Health , Superseded 22/03/2023
Definition:	The time at which a patient departs an emergency department after a stay, expressed as hhmm.
Context:	Emergency department care.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Emergency department stay—physical departure time
METEOR identifier:	472977
Registration status:	Independent Hospital Pricing Authority , Standard 31/10/2012 National Health Performance Authority (retired) , Retired 01/07/2016 Health , Superseded 20/10/2021 Tasmanian Health , Superseded 07/11/2023
Definition:	The time at which a patient departs an emergency department after a stay.
Context:	Emergency department care.
Object class:	Emergency department stay
Property:	Physical departure time

Source and reference attributes

Submitting organisation:	Australian Government Department of Health and Ageing

Value domain attributes

Identifying and definitional attributes

Value domain:	Time hhmm
METEOR identifier:	603275
Registration status:	Health , Superseded 20/10/2021 Tasmanian Health , Superseded 06/11/2023
Definition:	A valid time measured as hours and minutes using a 24 hour clock.

Representational attributes

Representation class:	Time
Data type:	Date/Time
Format:	hhmm
Maximum character length:	4

Source and reference attributes

Reference documents: Standards Australia 2007. AS ISO 8601-2007 Data elements and interchange formats—Information interchange—Representation of dates and times. Sydney: Standards Australia.

Data element attributes

Collection and usage attributes

Guide for use: The episode end status should guide the selection of the value to be recorded in this field:

- If the patient is subsequently admitted to this hospital (either short stay unit, hospital-in-the-home or non-emergency department hospital ward), then record the time the patient leaves the emergency department to go to the admitted patient facility.
 - Patients admitted to any other ward or bed within the emergency department have not physically departed the emergency department until they leave the emergency department.
 - If the patient is admitted and subsequently dies before leaving the emergency department, then record the time the body was removed from the emergency department.
- If the service episode is completed without the patient being admitted, then record the time the patient's emergency department non-admitted clinical care ended.
- If the service episode is completed and the patient is referred to another hospital for admission, then record the time the patient leaves the emergency department.
- If the patient did not wait, then record the time the patient leaves the emergency department or was first noticed as having left.
- If the patient leaves at their own risk, then record the time the patient leaves the emergency department or was first noticed as having left.
- If the patient died in the emergency department, then record the time the body was removed from the emergency department.
- If the patient was dead on arrival, then record the time the body was removed from the emergency department. If an emergency department physician certified the death of the patient outside the emergency department, then record the time the patient was certified dead.
- If the patient was registered, advised of another health-care service, and left the emergency department without being attended by a health-care professional, then record the time the patient leaves the emergency department.

Collection methods: Collected in conjunction with emergency department physical departure date.

Comments: This data element has been developed for the purpose of State and Territory compliance with the National Healthcare Agreement and the agreed national access performance indicator.
