Birth event

Identifying and definitional attributes

Metadata item type:	Object Class
METEOR identifier:	684797
Registration status:	Health , Standard 12/12/2018 Tasmanian Health , Standard 08/11/2023
Definition:	The sequence of actions by which a baby and the placenta are expelled or extracted from the female's uterus at childbirth. The process usually starts spontaneously about 280 days after conception with onset of labour, but it may be started by artificial means. The process ends upon complete expulsion or extraction of the baby and the placenta.
