Person—regular client indicator, yes/no code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Regular client indicator
METEOR identifier:	686291
Registration status:	Health , Standard 25/01/2018 Indigenous , Superseded 18/12/2023
Definition:	An indicator of whether a person is a regular client of an organisation or agency, as represented by a code.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Person—regular client indicator
METEOR identifier:	436653
Registration status:	Community Services (retired) , Standard 06/02/2012 Health , Standard 07/12/2011 Indigenous , Standard 13/03/2015
Definition:	An indicator of whether a person is a regular client of an organisation or agency.
Object class:	Person
Property:	Regular client indicator

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare (AIHW)

Data type:	Boolean	
Format:	N	
Maximum character length:	1	
	Value	Meaning
Permissible values:	1	Yes
	2	No

Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare

Data element attributes

Collection and usage attributes

Guide for use: CODE 1 Yes

A person is a regular client of the organisation or agency.

CODE 2 No

A person is not a regular client of the organisation or agency.

The definition of a regular client does not include deceased patients.

A person can be a regular client with one or more organisations or agencies and therefore may be counted more than once.

Collection methods: The definition of a regular client can vary depending on the context and/or collection in which the term is being applied, but generally involves a minimum number of visits to an organisation or agency or uses of a facility, occurring over a specific period of time. For example, in the primary health care context a regular client may be someone who has visited a particular primary health care provider 3 or more times in the last 2 years.

In some cases, a visit may be further defined as a clinical contact between a regular client and the organisation or agency that leads to either the creation of a new client record or the updating of an existing client record in the client management system of the organisation or agency. This could include clinical contacts by telephone.
