

Indigenous primary health care: PI10a- Number of regular clients with a smoking status result, 2015-2017

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Output measure
Short name:	PI10a-Number of regular clients with a smoking status result, 2015-2017
METEOR identifier:	686454
Registration status:	<ul style="list-style-type: none">• Health, Superseded 17/10/2018• Indigenous, Superseded 17/10/2018

Description:	<p>Number of regular clients who are Indigenous, aged 15 years and over and whose smoking status has been recorded within the previous 24 months as one of the following:</p> <ul style="list-style-type: none">• current smoker;• ex-smoker or;• never smoked.
---------------------	---

Rationale:	<p>Smoking has been identified as one of the key risk factors contributing to the burden of disease for Indigenous Australians. It is important that Indigenous primary health care services know the smoking status of clients in order to provide appropriate medical care.</p>
-------------------	---

Indicator set:	<p>Indigenous primary health care key performance indicators (2015-2017) Health, Superseded 17/10/2018 Indigenous, Superseded 17/10/2018</p>
-----------------------	--

Collection and usage attributes

Population group age from:	15 years
-----------------------------------	----------

Computation description: Count of regular clients who are Indigenous, aged 15 years and over and whose smoking status has been recorded within the previous 24 months as one of the following:

- current smoker;
- ex-smoker or;
- never smoked.

'Regular client' refers to a client of an Australian Government Department of Health-funded primary health care service (that is required to report against the Indigenous primary health care key performance indicators) who has an active medical record; that is, a client who has attended the Department of Health-funded primary health care service at least 3 times in 2 years.

Operationalisation of smoking status:

Where an Indigenous regular client's tobacco smoking status does not have an assessment date assigned within the Patient Information Record System (PIRS), smoking status as recorded in the PIRS should be treated as current (i.e. as having been updated within the previous 24 months).

Presented as a number.

Calculated separately for each smoking status.

Computation:

Numerator only.

Numerator:

Calculation A: Number of regular clients who are Indigenous, aged 15 years and over and whose smoking status has been recorded as 'current smoker' within the previous 24 months.

Calculation B: Number of regular clients who are Indigenous, aged 15 years and over and whose smoking status has been recorded as 'ex-smoker' within the previous 24 months.

Calculation C: Number of regular clients who are Indigenous, aged 15 years and over and whose smoking status has been recorded as 'never smoked' within the previous 24 months.

Numerator data elements:

Data Element / Data Set

[Person—tobacco smoking status, code N](#)
