# Indigenous primary health care: PI10b-Proportion of regular clients with a smoking status result, 2015-2017

# Identifying and definitional attributes

Metadata item type:	Indicator	
Indicator type:	Indicator	
Short name:	PI10b-Proportion of regular clients with a smoking status result, 2015-2017	
METEOR identifier:	686456	
Registration status:	<u>Health,</u> Superseded 17/10/2018 <u>Indigenous</u> , Superseded 17/10/2018	
Description:	Proportion of regular clients who are Indigenous, aged 15 years and over and whose smoking status has been recorded within the previous 24 months as one of the following:	
	<ul> <li>current smoker;</li> <li>ex-smoker or;</li> <li>never smoked.</li> </ul>	
Rationale:	Smoking has been identified as one of the key risk factors contributing to the burden of disease for Indigenous Australians. It is important that Indigenous primary health care services know the smoking status of clients in order to provide appropriate medical care.	
Indicator set:	Indigenous primary health care key performance indicators (2015-2017) Health, Superseded 17/10/2018 Indigenous, Superseded 17/10/2018	

# Collection and usage attributes

Population group age from:	15 years
Computation description:	Proportion of regular clients who are Indigenous, aged 15 years and over and whose smoking status has been recorded within the previous 24 months as one of the following:
	<ul> <li>current smoker;</li> <li>ex-smoker or;</li> <li>never smoked;</li> </ul>
	'Regular client' refers to a client of an Australian Government Department of Health- funded primary health care service (that is required to report against the Indigenous primary health care key performance indicators) who has an active medical record; that is, a client who has attended the Department of Health-funded primary health care service at least 3 times in 2 years.
	Operationalisation of smoking status:
	Where an Indigenous regular client's tobacco smoking status does not have an assessment date assigned within the Patient Information Record System (PIRS), smoking status as recorded in the PIRS should be treated as current (i.e. as having been updated within the previous 24 months).
	Presented as a percentage.
	Calculated separately for each smoking status.
Computation:	(Numerator ÷ Denominator) x 100

Calculation A: Number of regular clients who are Indigenous, aged 15 years and over and whose smoking status has been recorded as 'current smoker' within the previous 24 months.

Calculation B: Number of regular clients who are Indigenous, aged 15 years and over and whose smoking status has been recorded as 'ex-smoker' within the previous 24 months.

Calculation C: Number of regular clients who are Indigenous, aged 15 years and over and whose smoking status has been recorded as 'never smoked' within the previous 24 months.

# Data Element / Data Set

Person-tobacco smoking status, code N

# Data Source

Indigenous primary health care data collection

NMDS / DSS

Indigenous primary health care NBEDS 2017–18

## Guide for use

'Daily smoker', 'weekly smoker' and 'irregular smoker' are aggregated into 'current smoker'.
