Indigenous primary health care: PI01b-Proportion of Indigenous babies born within the previous 12 months whose birthweight has been recorded, 2018-2019

Identifying and definitional attributes

| | |
|-----------------------------|--|
| Metadata item type: | Indicator |
| Indicator type: | Indicator |
| Short name: | PI01b-Proportion of Indigenous babies born within the previous 12 months whose birthweight has been recorded, 2018-2019 |
| METEOR identifier: | 687918 |
| Registration status: | Health , Superseded 16/01/2020 Indigenous , Superseded 14/07/2021 |
| Description: | Proportion of Indigenous babies born within the previous 12 months whose birthweight has been recorded at the primary health-care service. |
| Rationale: | Low birthweight (newborn babies weighing less than 2,500 grams) is associated with an increased risk of ill health and is related to a higher mortality within the first year of life. Low birthweight is a particular issue for Indigenous Australians. Recording birthweight encourages the provision of appropriate care to limit the negative associations of low birthweight. |
| Indicator set: | Indigenous primary health care key performance indicators 2018-2019 Health , Superseded 16/01/2020 Indigenous , Superseded 14/07/2021 |

Collection and usage attributes

| | |
|---------------------------------|---|
| Computation description: | <p>Proportion of Indigenous babies born within the previous 12 months whose birthweight has been recorded at the primary health-care service.</p> <p>Birthweight is defined as the first weight of a baby obtained after birth.</p> <p>Only live births are included.</p> <p>Results arising from measurements conducted outside of the service, that are known by the service, are included in the calculation of this indicator.</p> <p>Presented as a percentage.</p> <p>'Previous 12 months' refers to the previous financial year or previous calendar year.</p> |
| Computation: | $(\text{Numerator} \div \text{Denominator}) \times 100$ |
| Numerator: | Number of Indigenous babies born within the previous 12 months whose birthweight has been recorded at the primary health-care service. |
