

Indigenous primary health care: PI03b-Proportion of regular clients for whom an MBS Health Assessment for Aboriginal and Torres Strait Islander People (MBS Item 715) was claimed, 2018-2019

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	PI03b-Proportion of regular clients for whom an MBS Health Assessment for Aboriginal and Torres Strait Islander People (MBS Item 715) was claimed, 2018-2019
METEOR identifier:	687927
Registration status:	<ul style="list-style-type: none">• Health, Superseded 16/01/2020• Indigenous, Superseded 14/07/2021

Description: Proportion of regular clients who are Indigenous, aged 0–4 years and for whom a Medicare Benefits Schedule (MBS) Health Assessment for Aboriginal and Torres Strait Islander People was claimed within the previous 12 months AND proportion of regular clients who are Indigenous, aged 25 and over and for whom an MBS Health Assessment for Aboriginal and Torres Strait Islander People was claimed within the previous 24 months.

Rationale: The role of primary health-care providers in early detection has been reinforced through the introduction of additional items under the MBS to encourage regular health assessments for all Aboriginal and Torres Strait Islander people. Regular health assessments encourage early detection, diagnosis and intervention for common and treatable conditions that cause morbidity and early mortality.

Indicator set: [Indigenous primary health care key performance indicators 2018-2019](#)
[Health](#), Superseded 16/01/2020
[Indigenous](#), Superseded 14/07/2021

Collection and usage attributes

Population group age from:	0–4 years
	25 years and over

Computation description: Proportion of regular clients who are Indigenous, aged 0–4 years and for whom an MBS Health Assessment for Aboriginal and Torres Strait Islander People was claimed within the previous 12 months AND proportion of regular clients who are Indigenous, aged 25 and over and for whom an MBS Health Assessment for Aboriginal and Torres Strait Islander People was claimed within the previous 24 months.

'Regular client' refers to a client of an Australian Government Department of Health-funded primary health-care service (that is required to report against the Indigenous primary health care key performance indicators) who has an active medical record; that is, a client who has attended the Department of Health-funded primary health-care service at least 3 times in 2 years.

MBS Health Assessment for Aboriginal and Torres Strait Islander People (MBS Item 715): A health assessment specifically available to all people of Aboriginal and Torres Strait Islander descent which can be used for health assessments across the age spectrum. The health assessment includes the assessment of a patient's physical health, and psychological and social well-being. It also assesses whether preventive health care and education should be offered to the patient, to improve that patient's health and well-being (DoH 2013).

Presented as a percentage.

Calculated separately for regular clients aged 0–4 years and 25 and older.

Computation: $(\text{Numerator} \div \text{Denominator}) \times 100$

Numerator: Calculation A: Number of regular clients who are Indigenous, aged 0–4 years and for whom an MBS Health Assessment for Aboriginal and Torres Strait Islander People (MBS Item 715) was claimed within the previous 12 months.

Calculation B: Number of regular clients who are Indigenous, aged 25 and over and for whom an MBS Health Assessment for Aboriginal and Torres Strait Islander People (MBS Item 715) was claimed within the previous 24 months.
