# National Core Maternity Indicators: PI 01–Tobacco smoking in pregnancy for all females giving birth, 2018

## Identifying and definitional attributes

<b>Metadata item type:</b>	Indicator
<b>Indicator type:</b>	Indicator
<b>Common name:</b>	Tobacco smoking in pregnancy
<b>Short name:</b>	PI 01–Tobacco smoking in pregnancy for all females giving birth, 2018
<b>METEOR identifier:</b>	690056
<b>Registration status:</b>	<a href="#">Health</a> , Superseded 19/06/2019
<b>Description:</b>	Among all females who gave birth, the proportion who (a) reported smoking tobacco in the first 20 weeks of pregnancy, and (b) reported smoking tobacco after the first 20 weeks of pregnancy and reported smoking at any time during pregnancy.
<b>Rationale:</b>	This outcome indicator is used to monitor public health.
<b>Indicator set:</b>	<a href="#">National Core Maternity Indicators, 2018</a> <a href="#">Health</a> , Superseded 19/06/2019

## Collection and usage attributes

<b>Computation description:</b>	<p>(a) The number of females who gave birth and reported smoking in the first 20 weeks of pregnancy, divided by the total number of females who have given birth, and multiplied by 100.</p> <p>(b) The number of females who gave birth and reported smoking after the first 20 weeks of pregnancy, divided by the total number of females who have given birth and reported smoking during pregnancy, and multiplied by 100.</p> <p>A birth is defined as an event in which a baby comes out of the uterus after a pregnancy of at least 20 weeks gestation or weighing 400 grams or more.</p> <p>Smoking refers to the use of cigarettes or inhaled tobacco.</p>
<b>Computation:</b>	$100 \times (\text{Numerator} \div \text{Denominator})$
<b>Numerator:</b>	<p>(a) The number of females who gave birth and reported smoking tobacco in the first 20 weeks of pregnancy.</p> <p>(b) The number of females who gave birth and reported smoking tobacco after the first 20 weeks of pregnancy.</p>

Data source type: Administrative by-product data

**Disaggregation:**

- Year of birth
- State or territory of birth
- Mother's age at birth
- Hospital annual number of births
- Hospital sector
- Indigenous status of mother
- Remoteness category (from mother's area of usual residence)
- Disadvantage quintile (from mother's area of usual residence)
- Primary Health Network (from mother's area of usual residence)
- Statistical local area 3 (from mother's area of usual residence)

**Guide for use**

Data source type: Administrative by-product data

**Comments:** Data elements are from the Perinatal National Minimum Data Set (NMDS) or have been provided as voluntary non-standardised items by the states and territories. Records with data that are missing, not stated or not interpretable have been excluded from the denominator.

Standardised data collection for smoking in pregnancy commenced for births from July 2010. This will enable reporting against parts (a) among all females who gave birth the proportion who reported smoking tobacco in the first 20 weeks of pregnancy, and (b) among all females who gave birth the proportion who reported smoking after 20 weeks of pregnancy and reported smoking at any time during pregnancy.

National Perinatal Data Collection (NPDC) data on smoking status and/or smoking quantity (number of cigarettes smoked) have been collected from New South Wales, Queensland, South Australia and Australian Capital Territory since 2001, and progressively from all other jurisdictions.

## Representational attributes

**Representation class:** Percentage

**Data type:** Real

**Unit of measure:** Person

**Format:** N[NN.N]

## Data source attributes

**Data sources:**

### Data Source

[AIHW National Perinatal Data Collection \(NPDC\)](#)

#### Frequency

Calendar years ending 31 December each year

#### Data custodian
