Female—number of standard drinks consumed when drinking alcohol in the first 20 weeks of pregnancy, total N[NN]

Identifying and definitional attributes

Metadata item type: Data Element

Short name: Number of standard drinks consumed when drinking alcohol in the first 20 weeks of

pregnancy

METEOR identifier: 690993

Registration status: Health, Standard 12/12/2018

Tasmanian Health, Standard 09/11/2023

Definition: The total number of standard drinks consumed on a typical day when drinking

alcohol by a female in the first 20 weeks of pregnancy.

Data Element Concept: Female—number of standard drinks consumed when drinking alcohol in the first 20

weeks of pregnancy

Value Domain: Total standard drinks N[NN]

Value domain attributes

Representational attributes

Representation class: Total

Data type: Number

Format: N[NN]

Maximum character length: 3

Value Meaning

Supplementary values: 998 Occasional drinking (less than one)

999 Not stated/inadequately described

Unit of measure: Standard drink

Collection and usage attributes

Guide for use: Alcohol consumption is usually measured in standard drinks.

An Australian standard drink contains 10 grams of alcohol, which is equivalent to 12.5 millilitres of alcohol. The numbers of Australian standard drinks in common containers of various alcoholic beverages is presented in the National Health and

Medical Research Council (NHMRC) 2009 guidelines.

This estimation is based on the person's description of the type (spirits, beer, wine, other) and number of standard drinks, as defined by the NHMRC, consumed per day. When calculating consumption in standard drinks per day, the total should be reported with part drinks recorded to the next whole standard drink (e.g. 2.4 = 3).

Data element attributes

Collection and usage attributes

Collection methods: This data element is self-reported.

Recommended question: 'How many standard drinks did you consume on a typical day when drinking alcohol during the first 20 weeks of pregnancy?' where the first 20 weeks of pregnancy is defined as less than or equal to 19 weeks + 6 days.

To ensure consistency of results, this data element should be collected after the first 20 weeks of pregnancy.
