

Female—number of standard drinks consumed when drinking alcohol after 20 weeks of pregnancy, total N[NN]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Number of standard drinks consumed when drinking alcohol after 20 weeks of pregnancy
METEOR identifier:	691039
Registration status:	<ul style="list-style-type: none">• Health, Standard 12/12/2018
Definition:	The total number of standard drinks consumed on a typical day when drinking alcohol by a female after 20 weeks of pregnancy until the birth.
Data Element Concept:	Female—number of standard drinks consumed when drinking alcohol after 20 weeks of pregnancy

Value domain attributes

Representational attributes

Representation class:	Total						
Data type:	Number						
Format:	N[NN]						
Maximum character length:	3						
Supplementary values:	<table><thead><tr><th>Value</th><th>Meaning</th></tr></thead><tbody><tr><td>998</td><td>Occasional drinking (less than one)</td></tr><tr><td>999</td><td>Not stated/inadequately described</td></tr></tbody></table>	Value	Meaning	998	Occasional drinking (less than one)	999	Not stated/inadequately described
Value	Meaning						
998	Occasional drinking (less than one)						
999	Not stated/inadequately described						
Unit of measure:	Standard drink						

Collection and usage attributes

Guide for use:	<p>Alcohol consumption is usually measured in standard drinks.</p> <p>An Australian standard drink contains 10 grams of alcohol, which is equivalent to 12.5 millilitres of alcohol. The numbers of Australian standard drinks in common containers of various alcoholic beverages is presented in the National Health and Medical Research Council (NHMRC) 2009 guidelines.</p> <p>This estimation is based on the person's description of the type (spirits, beer, wine, other) and number of standard drinks, as defined by the NHMRC, consumed per day. When calculating consumption in standard drinks per day, the total should be reported with part drinks recorded to the next whole standard drink (e.g. 2.4 = 3).</p>

Data element attributes

Collection and usage attributes

Collection methods: This data element is self-reported.

Recommended question: 'How many standard drinks did you consume on a typical day when drinking alcohol after the first 20 weeks of pregnancy until the birth?' where after 20 weeks of pregnancy is defined as greater than or equal to 20 weeks + 0 days.

To ensure consistency of results, this data element should be collected after the birth.
