National Bowel Cancer Screening Program: PI 02- Screening positivity rate

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	National Bowel Cancer Screening Program screening positivity percentage
Synonymous names:	NBCSP screening positivity percentage
METEOR identifier:	694158
Registration status:	Health , Standard 06/09/2018
Description:	The percentage of people who returned a valid National Bowel Cancer Screening Program (NBCSP) screening test and received a positive screening result (warranting further assessment) in a defined 12-month period .
Rationale:	<p>The positive screening test rate determines the cancer diagnostic assessment workload and lesion detection rate. It is important that the accepted positivity range is reviewed, revised if necessary, and defensible.</p> <p>Monitoring this is useful for program planning and quality assurance. Further, monitoring the positivity rate by various stratifications may reveal emerging positive or negative trends that need to be investigated and rectified if necessary.</p> <p>As a measure of program performance, the screening positivity is presented for a defined 12-month period. To ensure the latest screening results are being monitored, this indicator counts all tests analysed in the defined period, not tests from those invited in the defined period; therefore, the cohort monitored is different from that in the participation indicator.</p>
Indicator set:	National Bowel Cancer Screening Program performance indicators 2019– Health , Standard 06/09/2018

Collection and usage attributes

Computation:	100 x (Numerator ÷ Denominator)
Numerator:	The number of people who returned a valid NBCSP screening test and received a positive screening result in a defined 12-month period .

Disaggregation:

Items will be presented by sex and age group, by:

- State and territory
- Socioeconomic status
- Remoteness area
- Indigenous status
- Main language spoken at home
- Disability status
- Disease screening invitation round
- Screening test type

Some disaggregation may result in numbers too small for publication.
