Implementation in Data Set Specifications:

[Perinatal NMDS 2019–20 Health](#), Superseded 03/12/2020

Implementation start date: 01/07/2019

Implementation end date: 30/06/2020

DSS specific information:

Used to analyse the risk factors and outcomes by place of birth. While most deliveries occur within hospitals, an increasing number of births now occur in other settings. It is important to monitor the births occurring outside hospitals and to ascertain whether or not the actual place of delivery was planned.

This data element is recorded for the mother only. In the case of multiple births, this data element should be recorded for the first-born baby.
