# Birth event—intended setting of birth

## Identifying and definitional attributes

Metadata item type:	Data Element Concept
METEOR identifier:	695175
Registration status:	<a href="#">Health</a> , Standard 12/12/2018 <a href="#">Tasmanian Health</a> , Standard 09/11/2023
Definition:	The intended place of birth at the onset of labour.

## Object Class attributes

### Identifying and definitional attributes

Object class:	<a href="#">Birth event</a>
Definition:	The sequence of actions by which a baby and the placenta are expelled or extracted from the female's uterus at childbirth. The process usually starts spontaneously about 280 days after conception with onset of labour, but it may be started by artificial means. The process ends upon complete expulsion or extraction of the baby and the placenta.
