

Birth event—type of anaesthesia administered

Metadata item type:	Data Element Concept
METEOR identifier:	695523
Registration status:	<ul style="list-style-type: none">• Health, Superseded 03/12/2020
Definition:	The type of anaesthesia administered to a female during a birth event.
Context:	Perinatal

Object Class attributes

Identifying and definitional attributes

Object class:	Birth event
Definition:	The sequence of actions by which a baby and the placenta are expelled or extracted from the female's uterus at childbirth. The process usually starts spontaneously about 280 days after conception with onset of labour, but it may be started by artificial means. The process ends upon complete expulsion or extraction of the baby and the placenta.
