

# Birth event—additional indication for caesarean section

**Metadata item type:** Data Element Concept

**METEOR identifier:** 695684

**Registration status:**

- [Health](#), Standard 12/12/2018

**Definition:** An additional indication for a caesarean section being performed during a birth event.

## Object Class attributes

### Identifying and definitional attributes

**Object class:** [Birth event](#)

**Definition:** The sequence of actions by which a baby and the placenta are expelled or extracted from the female's uterus at childbirth. The process usually starts spontaneously about 280 days after conception with onset of labour, but it may be started by artificial means. The process ends upon complete expulsion or extraction of the baby and the placenta.
