Birth event—main indication for induction of labour

Identifying and definitional attributes

Metadata item type:	Data Element Concept
METEOR identifier:	695717
Registration status:	Health , Standard 12/12/2018
Definition:	The main indication for an induction of labour being performed to commence a birth event.

Object Class attributes

Identifying and definitional attributes

Object class:	Birth event
Definition:	The sequence of actions by which a baby and the placenta are expelled or extracted from the female's uterus at childbirth. The process usually starts spontaneously about 280 days after conception with onset of labour, but it may be started by artificial means. The process ends upon complete expulsion or extraction of the baby and the placenta.
