Person—cardiovascular disease condition targeted by drug therapy, code NN

Exported from METEOR (AIHW's Metadata Online Registry)

Person—cardiovascular disease condition targeted by drug therapy, code NN

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	CVD drug therapy condition
METEOR identifier:	696065
Registration status:	Health, Standard 17/10/2018
Definition:	The condition(s) for which drug therapy is being used for the prevention or long-term treatment of cardiovascular disease in a person, as represented by a code.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Person—cardiovascular disease condition targeted by drug therapy
METEOR identifier:	696063
Registration status:	Health, Standard 17/10/2018
Definition:	The condition(s) for which drug therapy is being used for the prevention or long-term treatment of cardiovascular disease in a person.
Context:	Public health, health care and clinical settings:
	Its main use is to enable categorisation of drug management regimens used in the community for the long-term care of patients with or at increased risk of vascular disease.
Object class:	Person
Property:	Cardiovascular disease condition targeted by drug therapy

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare

Value domain attributes

Identifying and definitional attributes

Value domain:	Drug therapy target cardiovascular condition code NN
METEOR identifier:	270765
Registration status:	Health, Standard 01/03/2005
Definition:	A code set representing cardiovascular condition targeted by drug therapy.

Representational attributes

Representation class:	Code	
Data type:	String	
Format:	NN	
Maximum character length:	2	
	Value	**Meaning**
Permissible values:	01	Heart failure

	02	Ischaemic heart disease
	03	Hypertension
	04	Atrial fibrillation (AF)
	05	Other dysrhythmia or conductive disorder
	06	Dyslipidaemia
	07	Peripheral vascular disease (PVD)
	08	Renal vascular disease
	09	Stroke
	10	Transient ischaemic attack (TIA)
	97	Other
	98	No CVD drugs prescribed
Supplementary values:	99	Not recorded

Collection and usage attributes

Guide for use: The categorisations may be made using the most recent version of the Australian Modification of the appropriate International Classification of Diseases codes.

Data element attributes

Collection and usage attributes

Guide for use: More than one code can be recorded.

Comments: References such as the Australian Medicines Handbook can be used to identify specific drugs that are appropriate for use in the management of the conditions identified in the value domain.

Source and reference attributes

Submitting organisation: Cardiovascular Data Working Group
