

# Total standard drinks N[N]

## Identifying and definitional attributes

|                             |  |
|-----------------------------|--|
| <b>Metadata item type:</b>  | Value Domain   |
| <b>METEOR identifier:</b>   | 696832   |
| <b>Registration status:</b> | <ul style="list-style-type: none"><li><a href="#">Health</a>, Qualified 30/05/2018</li></ul> |
| <b>Definition:</b>          | Total number of standard drinks.   |

## Representational attributes

|                                  |                |
|----------------------------------|----------------|
| <b>Representation class:</b>     | Total          |
| <b>Data type:</b>                | Number         |
| <b>Format:</b>                   | N[N]           |
| <b>Maximum character length:</b> | 2              |
| <b>Supplementary values:</b>     | 9 Unknown      |
| <b>Unit of measure:</b>          | Standard drink |

## Collection and usage attributes

|                       |  |
|-----------------------|--|
| <b>Guide for use:</b> | <p>For use in Prisoner health data collections. If this value domain is used with other metadata 'Unknown' would be mapped to code 8.</p> <p>Alcohol consumption is usually measured in standard drinks.</p> <p>An Australian standard drink contains 10 grams of alcohol, which is equivalent to 12.5 millilitres of alcohol. The numbers of Australian standard drinks in common containers of various alcoholic beverages is presented in the National Health and Medical Research Council (NHMRC) 2009 guidelines.</p> |
|-----------------------|--|

## Source and reference attributes

|                                 |  |
