Venous thromboembolism prevention clinical care standard indicators: Proportion of patients separated from hospital on venous thromboembolism prophylaxis with a care plan documenting prescribed medicine(s), dose, and duration of treatment

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
METEOR identifier:	697348
Registration status:	Australian Commission on Safety and Quality in Health Care, Standard 11/10/2018
Description:	Proportion of patients separated from hospital on <u>venous thromboembolism</u> (VTE) prophylaxis with a care plan documenting prescribed medicine(s), dose, and duration of treatment.
Indicator set:	<u>Clinical care standard indicators: venous thromboembolism (VTE) prevention</u> <u>Australian Commission on Safety and Quality in Health Care</u> , Standard 11/10/2018

Collection and usage attributes

Computation description:	For the numerator, the care plan should document all prescribed medicines, not just those specific to VTE prophylaxis.
	Presented as a percentage.
Computation:	(Numerator ÷ Denominator) x 100
Numerator:	The number of patients separated from hospital on VTE prophylaxis with a care plan documenting prescribed medicine(s), dose, and duration of treatment.
Denominator:	The number of patients separated from hospital on VTE prophylaxis.

Representational attributes

Representation class:	Percentage
Data type:	Real
Unit of measure:	Service event
Format:	N[NN]

Accountability attributes

Other issues caveats: Applicable settings: public and private hospitals and day procedure centre.
