Prisoner health NBEDS 2018

Identifying and definitional attributes

Metadata item type: Data Set Specification

METEOR identifier: 698664

Registration status: [Health](#), Superseded 29/05/2024

DSS type: Data Set Specification (DSS)

Scope: The Prisoner health National Best Endeavours Data Set (NBEDS) defines data collected from all public and private prisons throughout Australia on prison entrants, prisoners who visit a prison clinic, prisoners who are taking prescription medication while in custody, prison clinic services and staffing levels, and prison dischargees. The data are used to report against the National Prisoner Health Indicators, assist in monitoring the health of prisoners and inform prisoner health service planning and delivery.

In the National Prisoner Health Data Collection public and private prisons include those administered by Corrective Services departments, including correctional facilities and remand centres. Excluded from the collection are periodic detention centres, court and police cells, juvenile detention centres, immigration detention centres, secure psychiatric facilities, military prisons, and home detention programs.

The Prisoner health NBEDS contains five component data set specifications:

Prison entrants NBEDS: defines data on all prisoners entering prison in the National Prisoner Health Data Collection period. This includes demographics, mental health, chronic diseases, alcohol and other drug use, use of health services and pregnancy.

Prison clinic NBEDS: defines data from all visits by prisoners to the prison clinic during the National Prisoner Health Data Collection period regarding the number of clinic contacts each prisoner made and the reason for clinic attendance.

Prisoners prescription medications NBEDS: defines data on the category of prescription medications administered to prisoners on one day during the National Prisoner Health Data Collection period.

Prison establishments NBEDS: defines data provided by prison clinic management regarding the services provided by prison clinics.

Prison dischargee NBEDS: defines data on all prisoners who are going to be discharged from the prison system in the following 4 weeks from the date of data collection, during the National Prisoner Health Data Collection period. This includes demographics, mental health, chronic diseases, alcohol and other drug use, use of prison clinics and services accessed in prison.

8	Prison dischargée—level of worry related to other issues, a lot/a little/not at all/unknown code N	Mandatory	1
19	Person—self-harm indicator, prisoner health yes/no/unknown code N	Mandatory	2

DSS specific information:

This data element corresponds to the following questions of the Prison Dischargee Form:

15a. Prior to your current incarceration, have you ever intentionally harmed yourself?

15b. While in prison this time, did you intentionally harm yourself?

This item is collected once for self-harm prior to imprisonment, and once for self-harm while in prison.

This data element is included in the Prisoner health NBEDS as the National Prisoner Health Indicators include the indicators: Proportion of prison entrants who have ever intentionally harmed themselves and Proportion of prison dischargees who have intentionally harmed themselves in prison.

In the Prison dischargee NBEDS 2018 this element is collected twice, as follows:

1. For persons who have ever intentionally harmed themselves prior to current incarceration. This corresponds to question 15a. of the dischargee form.
2. For persons who have intentionally harmed themselves during their most recent time in prison. This corresponds to question 15b. of the dischargee form.
