

National Indigenous Reform Agreement: PI 15a-Proportion of Indigenous 20–64 year olds with or working towards a post-school qualification in Certificate level III or above (Census data), 2019

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	PI 15a-Proportion of Indigenous 20–64 year olds with or working towards a post-school qualification in Certificate level III or above (Census data), 2019
METEOR identifier:	699476
Registration status:	<ul style="list-style-type: none">• Indigenous, Superseded 23/08/2019
Description:	The proportion of people aged 20–64 with, or working towards, post-school qualifications in Australian Qualifications Framework (AQF) Certificate level III or above, by Indigenous status.
Rationale:	Post-secondary education leads to better employment prospects and, for Indigenous people, will help to achieve the Closing the Gap target 'Halve the gap in employment outcomes between Indigenous and non-Indigenous Australians within a decade (by 2018)'.
Indicator set:	National Indigenous Reform Agreement (2019) Indigenous , Superseded 23/08/2019
Outcome area:	The Indigenous workforce age population has the depth and breadth of skills and capabilities required for the 21st century labour market Indigenous , Standard 21/07/2010

Quality statement: [National Indigenous Reform Agreement: PI 15a-Proportion of Indigenous 20-64 year olds with or working towards a post-school qualification in Certificate level III or above. \(Census data\) 2019; Quality Statement](#) Indigenous, Standard 07/02/2019

Collection and usage attributes

Population group age from: 20 years

Population group age to: 64 years

Computation description: Presentation: Number and percentage (per 100 persons).

Computation: $100 \times (\text{Numerator} \div \text{Denominator})$.

Numerator: People aged 20–64 who have attained a post-school qualification at the AQF Certificate level III or above, or are currently studying a non-school qualification at any level.

Comments:

The 2016 Census data, except for remoteness data, were provided for the 2018 NIRA report. Remoteness data will be provided for the 2019 report (2017–18 reporting cycle).

The 2011 Census data were provided for the 2013 NIRA report but were not available disaggregated by remoteness. The 2011 Census data were resupplied for 2014 reporting disaggregated by remoteness.

The baseline report reported data from the 2006 Census as the main data collection.

For people 'with' a non-school qualification:

- People whose level of education was inadequately described are excluded from the calculation (numerator and denominator).
- The Census measure excludes people whose level of highest non-school qualification or attendance status is not stated or inadequately described if they fail to meet the indicator criteria for either variable.
- People whose level of non-school qualification is determined to be certificate level but is not able to be further defined (that is, coded as Certificate nfd) are assumed to have attained a qualification below Certificate level III and are therefore excluded from the numerator for this indicator.

For people 'working towards' a non-school qualification:

- Level of qualification is not available for people 'working towards' post-school qualifications. Therefore, people who are currently studying a non-school qualification at any level are included in the calculations for this indicator.

The denominator excludes people whose level of non-school qualification or attendance status was not stated.

At this stage, the Australian Bureau of Statistics (ABS) advises that information is only available on qualification levels for those who have completed studies (not those who are currently studying). Therefore, the ABS recommended restricting the definition for baseline reporting accordingly to those who have completed Certificate level III or above, and those currently studying a non-school qualification.

Baseline year for the Council of Australian Governments' NIRA target (Halve the gap in employment outcomes between Indigenous and non-Indigenous Australians within a decade) is 2008; baseline year for this measure is 2006.

The term 'Aboriginal and Torres Strait Islander people' is preferred when referring to the separate Indigenous peoples of Australia. However, the term 'Indigenous' is used interchangeably with 'Aboriginal and Torres Strait Islander' in this indicator to assist readability.

Representational attributes

Representation class:	Percentage
Data type:	Real
Unit of measure:	Person
Format:	NN.N

Indicator conceptual framework

Data source attributes

Data sources: **Data Source**

[Census of Population and Housing](#)

Frequency

Every 5 years

Accountability attributes

Organisation responsible for providing data: Australian Bureau of Statistics

Further data development / collection required: Data are required on the level of qualification for those currently studying (working towards a qualification).

The ABS has collected level and field of current study in the 2012–13 Australian Aboriginal and Torres Strait Islander Health Survey and the 2014–15 National Aboriginal and Torres Strait Islander Social Survey. These data are also available in the annual ABS Survey of Education and Work.
