Classification scheme attributes

Classification scheme:	International Statistical Classification of Diseases and Related Health Problems, Tenth Revision, Australian Modification 11th edition
Synonymous names:	ICD-10-AM 11th edn
METEOR identifier:	699536
Definition:	A statistical health classification of diseases and related health problems.
Registration status:	Health , Superseded 20/10/2021 Tasmanian Health , Superseded 07/11/2023

Classification structure: ICD-10-AM is comprised of:

- Tabular List of Diseases - contains core three character codes with some expansion to four and five character codes. Two appendices are specified: Morphology of neoplasms; and Special tabulation lists for mortality and morbidity.
- Alphabetic Index of Diseases - consists of three sections: Section I is the index of diseases, syndromes, pathological conditions, injuries, signs, symptoms, problems and other reasons for contact with health services. Section II is the index of external causes of injury. The terms included here are not medical diagnoses but descriptions of the circumstances in which the violence occurred. Section III is the index of drugs and other chemical substances giving rise to poisoning or other adverse effects (also known as the Table of drugs and chemicals).
