<b>Short name:</b>	Hospital Initiated Postponements
<b>METEOR identifier:</b>	704425

## Collection and usage attributes

<b>Computation description:</b>	Determine the number of patients that are postponed due to no beds by the hospital pre-admission.  Include only those patients identified as postponed 'Pre-Admission'. This can be determined by looking for a matching inpatient episode. If no inpatient episode is found the postponement occurred pre-admission. Otherwise if there is a matching inpatient episode then this is evidence the patient was admitted and the postponement occurred "Post-Admission".
<b>Computation:</b>	$100 \times (\text{Numerator} \div \text{Denominator})$
<b>Numerator:</b>	Count the total number of pre-admission Hospital Initiated Postponements due to no beds for patients waiting on the Elective Surgery Waiting List.
