Value domain attributes

Representational attributes

Representation class:	Identifier
Data type:	String
Format:	X[X(29)]
Maximum character length:	30

Data element attributes

Collection and usage attributes

Guide for use:	Where states or territories have unique professional staff identifiers this code, or a computed equivalent (to protect provider privacy) should be used.
Comments:	This data element provides a means to a field for a unique identifier for each allied health provider. This will enable data quality checks to be performed on the data.
