Object Class attributes

Identifying and definitional attributes

Object class: [Allied health clinical support activity](#)
Definition: Any activity performed by an [allied health service provider](#) which supports allied health clinical care.

Collection and usage attributes

Guide for use: Allied health professional clinical support activity will be counted using various parameters. The sum total of allied health clinical support activity for each [allied health service provider](#) is limited to a single day duration i.e. maximum of 1,440 minutes.

Comments: An allied health clinical support activity is performed by an allied health professional, assistant or student working within the professions identified in [Allied health clinical support activity – provider profession, code N\[N\]](#).

A clinical support activity is any activity undertaken by an allied health professional, assistant or student which supports clinical care.

For example:

An activity that provides a service to an individual, group or community to influence health status; preparation and delivery of formal in-services, lectures, tutorials or seminars which impart knowledge to staff and students; formal research activities undertaken to advance the knowledge of the delivery of care to an individual, group or community. This item is limited to activities that lead to, and follow formal approval of the project by a research committee or equivalent body.
