Person—birthweight recorded indicator, yes/no code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Birthweight recorded indicator
METEOR identifier:	709571
Registration status:	Health , Standard 12/12/2018 Indigenous , Standard 02/04/2019
Definition:	An indicator of whether a person's birthweight has been recorded, as represented by a code.
Data Element Concept:	Person—birthweight recorded indicator
Value Domain:	Yes/no code N

Value domain attributes

Representational attributes

Representation class:	Code	
Data type:	Boolean	
Format:	N	
Maximum character length:	1	
	Value	Meaning
Permissible values:	1	Yes
	2	No

Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare

Data element attributes

Collection and usage attributes

Guide for use:	CODE 1 Yes
	A person's birthweight has been recorded.
	CODE 2 No
	A person's birthweight has not been recorded.

Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare (AIHW)

Implementation in Data Set Specifications: [Aboriginal and Torres Strait Islander specific primary health care NBEDS December 2023](#)

[Indigenous](#), Superseded 27/04/2024

Implementation start date: 01/07/2023

Implementation end date: 31/12/2023

Conditional obligation:

Data are only provided to the AIHW for babies born during the preceding 12 months up to the census date. In the case of multiple births, data should be recorded for each baby born.

Data are provided to the AIHW for [live births](#) only.

DSS specific information:

In the ATSI SPHC NBEDS only aggregated data with 'CODE 1 Yes' are provided to the AIHW.

In the ATSI SPHC NBEDS, babies do not need to fulfil all the requirements of being a First Nations regular client, as long as they have a medical record at the health organisation and have attended more than once. Attendance is counted using the baby's client record only.

The birthweight is to be taken from the baby's client record where available. Where the birthweight is not recorded in the baby's client record, the mother's record may be used as a source of birth details.

The birthweight may have been recorded during an appointment or received from sharing client data with other organisations, such as a hospital.

[Aboriginal and Torres Strait Islander specific primary health care NBEDS June 2024](#)

[Indigenous](#), Standard 27/04/2024

Implementation start date: 01/01/2024

Implementation end date: 30/06/2024

Conditional obligation:

Data are only provided to the AIHW for babies born during the preceding 12 months up to the census date. In the case of multiple births, data should be recorded for each baby born.

Data are provided to the AIHW for [live births](#) only.

DSS specific information:

In the ATSI SPHC NBEDS only aggregated data with 'CODE 1 Yes' are provided to the AIHW.

In the ATSI SPHC NBEDS, babies do not need to fulfil all the requirements of being a [First Nations regular client](#), as long as they have a medical record at the health organisation and have attended more than once. Attendance is counted using the baby's client record only.

The [birthweight](#) is to be taken from the baby's client record where available. Where the birthweight is not recorded in the baby's client record, the mother's record may be used as a source of birth details.

The birthweight may have been recorded during an appointment or received from sharing client data with other organisations, such as a hospital.

[Health](#), Superseded 16/01/2020

[Indigenous](#), Superseded 14/07/2021

Implementation start date: 01/07/2019

Implementation end date: 30/06/2020

Conditional obligation:

This item is only collected for infants born during the preceding 12 months.

[Indigenous primary health care NBEDS 2020–21](#)

[Health](#), Retired 13/10/2021

Implementation start date: 01/07/2020

Implementation end date: 30/06/2021

Conditional obligation:

This item is only collected for babies born during the preceding 12 months.

In the case of multiple births, this data element should be recorded for each baby born.

[Indigenous-specific primary health care NBEDS December 2020](#)

[Indigenous](#), Superseded 03/07/2022

Implementation start date: 01/07/2020

Implementation end date: 31/12/2020

Conditional obligation:

Data are only provided to the AIHW for babies born during the preceding 12 months up to the census date. In the case of multiple births, data should be recorded for each baby born.

Data are provided to the AIHW for [live births](#) only.

Data are not provided to the AIHW for babies without a medical record of their own at the health organisation, even if their information is recorded in their mother's record.

DSS specific information:

In the ISPHC NBEDS, babies do not need to fulfil all the requirements of being an [Indigenous regular client](#), as long as they have a file at the health organisation.

The birthweight may have been recorded during an appointment or received from sharing client data with other organisations, such as a hospital.

In the ISPHC NBEDS only aggregated data with CODE 1 are provided to the AIHW.

[Indigenous-specific primary health care NBEDS December 2021](#)

[Indigenous](#), Superseded 12/06/2023

Implementation start date: 01/07/2021

Implementation end date: 31/12/2021

Conditional obligation:

Data are only provided to the AIHW for babies born during the preceding 12 months up to the census date. In the case of multiple births, data should be recorded for each baby born.

Data are provided to the AIHW for [live births](#) only.

DSS specific information:

In the ISPHC NBEDS, babies do not need to fulfil all the requirements of being an [Indigenous regular client](#), as long as they have a file at the health organisation and have attended more than once. Attendance is counted using the baby's client record only.

The birthweight is to be taken from the baby's client record where available. Where the birthweight is not recorded in the baby's client record, the mother's record may be used as a source of birth details.

The birthweight may have been recorded during an appointment or received from sharing client data with other organisations, such as a hospital.

In the ISPHC NBEDS only aggregated data with CODE 1 are provided to the AIHW.
