# Product of birth—type of autopsy performed, code N

## Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Type of autopsy
METEOR identifier:	716412
Registration status:	<a href="#">Health</a> , Standard 17/12/2021
Definition:	The type of post-mortem examination performed on a product of birth, as represented by a code.

## Data element concept attributes

### Identifying and definitional attributes

Data element concept:	<a href="#">Product of birth—type of autopsy performed</a>
METEOR identifier:	716406
Registration status:	<a href="#">Health</a> , Standard 17/12/2021
Definition:	The type of post-mortem examination performed on a product of birth.
Object class:	<a href="#">Product of birth</a>
Property:	<a href="#">Type of autopsy performed</a>

## Value domain attributes

### Identifying and definitional attributes

Value domain:	<a href="#">Type of autopsy code N</a>
METEOR identifier:	716408
Registration status:	<a href="#">Health</a> , Standard 17/12/2021
Definition:	A code set representing the type of autopsy performed.

## Representational attributes

<b>Representation class:</b>	Code	
<b>Data type:</b>	Number	
<b>Format:</b>	N	
<b>Maximum character length:</b>	1	
	<b>Value</b>	<b>Meaning</b>
<b>Permissible values:</b>	1	Full autopsy performed
	2	Limited autopsy performed
	3	Autopsy performed but type unknown
<b>Supplementary values:</b>	7	Not applicable
	9	Not stated/inadequately described

## Collection and usage attributes

**Guide for use:****CODE 1 Full autopsy performed**

Use this code if a full autopsy was performed. A full autopsy is a comprehensive review of the clinical notes and maternal investigations, placental examination, and examination of the product of birth including measurements and clinical photographs, radiological investigations, evisceration, dissection, and organ examination, including detailed histological evaluation.

**CODE 2 Limited autopsy performed**

A limited autopsy is performed when the extent of the examination of the product of birth is limited, compared to a full autopsy. A limited autopsy may include detailed external, placental and umbilical cord examinations and external measurements, skin/needle blood sampling, clinical photography, radiological investigations, external examination and some testing on small samples of tissue internal examination limited to certain areas of the body.

**CODE 3 Autopsy performed but type unknown**

Use this code if an autopsy was performed on the product of birth but the type of autopsy is unknown.

**CODE 7 Not applicable**

Use this code if no autopsy was performed on the product of birth.

**CODE 9 Not stated/inadequately described**

Use this code when data is missing or inadequately described. It is not intended for use on primary collection instruments.
