

Indigenous primary health care: PI16a-Number of regular clients whose alcohol consumption status has been recorded, June 2020

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Output measure
Short name:	PI16a-Number of regular clients whose alcohol consumption status has been recorded, 2020–2021
METEOR identifier:	717330
Registration status:	<ul style="list-style-type: none">• Health, Retired 13/10/2021• Indigenous, Superseded 14/07/2021
Description:	Number of regular clients who are Indigenous, aged 15 and over and who have had their alcohol consumption status recorded at the primary health-care service within the previous 24 months.
Rationale:	It is important to collect information on alcohol consumption because excessive consumption is associated with health and social problems in all populations, including the Indigenous population.
Indicator set:	Indigenous primary health care key performance indicators June 2020 Health , Retired 13/10/2021 Indigenous , Superseded 14/07/2021

Collection and usage attributes

Population group age from:	15 years
Computation description:	<p>Count of regular clients who are Indigenous, aged 15 and over and who have had their alcohol consumption status recorded at the primary health care service within the previous 24 months.</p> <p>‘Regular client’ refers to a client of an Australian Government Department of Health-funded primary health-care service (that is required to report against the Indigenous primary health care key performance indicators) who has an active medical record; that is, a client who has attended the Department of Health-funded primary health-care service at least 3 times in 2 years.</p> <p>Alcohol consumption status has been recorded if the health service has either:</p> <ul style="list-style-type: none">a) a record of whether the client consumes alcohol or;b) a record specifying the amount and frequency of the client’s alcohol consumption. <p>Results arising from measurements conducted outside of the service, that are known by the service, are included in the calculation of this indicator.</p> <p>Operationalisation of alcohol consumption status:</p> <p>Where an Indigenous regular client’s alcohol consumption status does not have an assessment date assigned within the Patient Information Record System (PIRS), alcohol consumption status as recorded in the PIRS should be treated as current (i.e. as having been updated within the previous 24 months).</p> <p>Presented as a number.</p>

Computation: Numerator only.

Numerator: Number of regular clients who are Indigenous, aged 15 and over and who have had their alcohol consumption status recorded at the primary health-care service within the previous 24 months.
