Indigenous primary health care: PI17a-Number of regular clients who had an AUDIT-C with result within specified levels, June 2020

Identifying and definitional attributes

Metadata item type: Indicator

Indicator type: Output measure

Short name: PI17a-Number of regular clients who had an AUDIT-C with result (score) within

specified levels, 2020-2021

METEOR identifier: 717334

Registration status: Health, Retired 13/10/2021

Indigenous, Superseded 14/07/2021

Description: Number of regular Indigenous clients, aged 15 and over, who have had an AUDIT-C

result recorded within the previous 24 months with a score of:

greater than or equal to 4 in males and 3 in females; or

less than 4 in males and 3 in females.

Rationale: Excessive or hazardous alcohol consumption is associated with health and social

problems in all populations, including Indigenous Australians. The information generated using AUDIT-C screening test may be used to advise or refer the person

to change their drinking habit.

Indigenous primary health care key performance indicators June 2020

Health, Retired 13/10/2021

Indigenous, Superseded 14/07/2021

Collection and usage attributes

Population group age

from:

15 years

Computation description: Number of regular Indigenous clients, aged 15 and over, who have had an AUDIT-C

result recorded within the previous 24 months with a score of:

• greater than or equal to 4 in males and 3 in females; or

less than 4 in males and 3 in females.

'Regular client' refers to a client of an Australian Government Department of Healthfunded primary health-care service (that is required to report against the Indigenous primary health care key performance indicators) who has an active medical record; that is, a client who has attended the Department of Health-funded primary health-

care service at least 3 times in 2 years.

Computation: Numerator only.

Numerator: Calculation A: Number of regular Indigenous clients, aged 15 and over, who have

had an AUDIT-C result recorded within the previous 24 months with a score of

greater than or equal to 4 in males and 3 in females.

Calculation B: Number of regular Indigenous clients, aged 15 and over, who have had an AUDIT-C result recorded within the previous 24 months with a score of less

than 4 in males and 3 in females.
