Perineal status code N[N]

Identifying and definitional attributes

Metadata item type:	Value Domain
METEOR identifier:	717921
Registration status:	Health , Superseded 03/12/2020
Definition:	A code set representing the state of the perineum.

Representational attributes

Representation class:	Code
Data type:	Number
Format:	N[N]
Maximum character length:	2

	Value	Meaning
Permissible values:	1	Intact
	2	1st degree laceration/vaginal graze
	3	2nd degree laceration
	4	3rd degree laceration
	5	Episiotomy
	7	4th degree laceration
	88	Other perineal laceration, rupture or tear
Supplementary values:	99	Not stated/inadequately described

Collection and usage attributes

Guide for use:**CODE 1 Intact**

Should not be recorded in conjunction with any other code.

CODE 2 1st degree laceration/vaginal graze

Graze, laceration, rupture or tear of the perineal skin during delivery that may be considered to be slight or that involves one or more of the following structures:

- fourchette
- labia
- periurethral tissue (excluding involvement of urethra)
- vagina, low
- skin
- vulva.

Should not be recorded in conjunction with any other code except for Code 5 (Episiotomy).

CODE 3 2nd degree laceration

Perineal laceration, rupture or tear as in Code 2 occurring during delivery, also involving:

- pelvic floor
- perineal muscles
- vaginal muscles.

Excludes laceration involving the anal sphincter. Should not be recorded in conjunction with any other code except for Code 5 (Episiotomy).

CODE 4 3rd degree laceration

Perineal laceration, rupture or tear as in Code 3 occurring during delivery, also involving:

- anal sphincter (excluding involvement of anal or rectal mucosa)
- rectovaginal septum
- sphincter not otherwise specified (NOS).

Excludes laceration involving the anal or rectal mucosa. Should not be recorded in conjunction with any other code except for Code 5 (Episiotomy).

CODE 7 4th degree laceration

Perineal laceration, rupture or tear as in Code 4 occurring during delivery, also involving:

- anal mucosa
- rectal mucosa.

Should not be recorded in conjunction with any other code except for Code 5 (Episiotomy).

CODE 88 Other perineal laceration, rupture or tear

May include haematoma or unspecified perineal tear. Should not be recorded in conjunction with any other code except for Code 5 (Episiotomy).

Comments:

If a laceration occurred during delivery and an episiotomy was performed, both the degree of laceration and the episiotomy should be recorded. If an episiotomy is performed, the perineum cannot be intact.

While 4th degree laceration is more severe than an episiotomy, this category has not been placed in order of clinical significance within the value domain.

Code 6 has been omitted as it is no longer in use. For information about its meaning in previous data elements, see superseded versions.
