Service Plan - Department of Health Tasmania: 2019, Admitted patient episode coding (clinical coding) including contracted care - accuracy within 30 days of advice of error from the Department (State-wide), 2019

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	Admitted patient episode coding (clinical coding) including contracted care - accuracy
METEOR identifier:	717943
Registration status:	Tasmanian Health , Standard 24/07/2019
Description:	This KPI measures the percentage of fatal data errors (as specified in the schedule below) that are corrected within 30 days of being reported by DoH to THS.
Indicator set:	Service Plan - Department of Health Tasmania: 2019 Tasmanian Health , Standard 20/01/2020

Collection and usage attributes

Computation description: This KPI is measured as a percentage.

At the end of each month, DoH will provide THS with a list of fatal data errors detected over the previous month. Errors not corrected by THS within 30 days of receipt of the list will be considered to fail. The date of receipt will be considered to be the date upon which the list of fatal data errors is e-mailed to THS by PPP. The list will clearly indicate the date by which the correction of fatal data errors is to occur.

Computation:	$100 \times (\text{Numerator} \div \text{Denominator})$
Numerator:	Number of fatal data errors (described in the KPI schedule) notified in the monthly list of fatal data errors that have been corrected within 30 days of receipt of the list
Denominator:	Number of fatal data errors (described in the KPI schedule) notified in the monthly list of fatal data errors for the KPI assessment period

Representational attributes

Representation class:	Percentage
Data type:	Real
Unit of measure:	Episode
Format:	NN[N]
