Person—level of functional independence, Resource Utilisation Groups—Activities of Daily Living total score code N[N]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Level of functional independence (total RUG-ADL score)
METEOR identifier:	717986
Registration status:	Health , Superseded 20/12/2022 Tasmanian Health , Superseded 28/03/2023
Definition:	A person's level of functional independence to carry out activities of daily living safely and autonomously, as represented by a total Resource Utilisation Groups-Activities of Daily Living score-based code.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Person—level of functional independence
METEOR identifier:	680996
Registration status:	Tasmanian Health , Standard 19/01/2018 Health , Standard 25/01/2018
Definition:	A person's level of functional independence to carry out activities of daily living safely and autonomously.
Object class:	Person
Property:	Level of functional independence

Source and reference attributes

Submitting organisation:	Independent Hospital Pricing Authority
---------------------------------	--

Value domain attributes

Identifying and definitional attributes

Value domain:	Resource Utilisation Groups—Activities of Daily Living total score code N[N]
METEOR identifier:	717984
Registration status:	Tasmanian Health , Standard 06/05/2020 Health , Superseded 20/12/2022
Definition:	A code set representing an individual's need for assistance with four activities of daily living.

Representational attributes

Representation class:	Total
Data type:	Number
Format:	N[N]
Maximum character length:	2

	Value	Meaning
Supplementary values:	99	Not stated/inadequately described
Unit of measure:	Score	

Collection and usage attributes

Guide for use:	The Resource Utilisation Groups - Activities of Daily Living (RUG-ADL) is a four item scale measuring a person's motor function for activities of daily living including: • bed mobility • toileting • transfers • eating. Valid values for the bed mobility, toileting and transfers item scales: 1 - Independent or supervision only 3 - Limited physical assistance 4 - Other than two persons physical assist 5 - Two or more person physical assist <i>Note: a score of 2 is not valid.</i> Valid values for the eating item scale: 1 - Independent or supervision only 2 - Limited assistance 3 - Extensive assistance/total dependence/tube fed <i>Note: a score of 4 or 5 is not valid.</i> Scores are summed for the four Activities of Daily Living (ADL) variables (i.e. bed mobility, toileting, transfers and eating) to reach a total RUG-ADL score. A total RUG-ADL score ranges from a minimum score of 4 to a maximum score of 18. The RUG-ADL <i>total</i> score code is different from the Resource Utilisation Groups-Activities of Daily Living score code N as it represents the total of all the individual RUG-ADL item scores added together. CODE 99 Not stated/inadequately described This code should be used in circumstances where the RUG-ADL total score code can not be reported due to one or more item scales not being collected. This code is not to be used on RUG-ADL data collection forms.

Implementation in Data Set Specifications:

[Admitted subacute and non-acute hospital care NBEDS 2020–21 Health](#), Superseded 05/02/2021

Implementation start date: 01/07/2020

Implementation end date: 30/06/2021

Conditional obligation:

Only required to be reported for episodes of admitted patient care with [Hospital service—care type, code N\[N\]](#) recorded as:

- Code 3, Palliative care; or
- Code 6, Maintenance care.

DSS specific information:

Only the [Resource Utilisation Groups—Activities of Daily Living](#) (RUG-ADL) scores at admission are required to be reported for maintenance care episodes.

RUG-ADL scores at palliative care phase start should be reported for all palliative care phases.

Not required to be reported for patients aged 17 and under at admission.

For episodes of admitted patient care with [Hospital service—care type, code N\[N\]](#) recorded as Code 3, Palliative care, the RUG-ADL scores must be reported for each [palliative care phase](#) if the episode of admitted patient care had more than one phase.

[Admitted subacute and non-acute hospital care NBEDS 2021–22 Health](#), Superseded 20/10/2021

Implementation start date: 01/07/2021

Implementation end date: 30/06/2022

Conditional obligation:

Only required to be reported for episodes of admitted patient care with [Hospital service—care type, code N\[N\]](#) recorded as:
