1. Health conditions

Identifying and definitional attributes

Item type:	Framework Dimension
METEOR identifier:	721649
Description:	Health conditions such as low birthweight, cancer, diabetes, infections, injury or psychological distress can impose significant costs on society in terms of health system use, days off work because of illness or to care for people who are ill, and reduced quality of life. The incidence and prevalence of conditions across the community can provide an overall picture of the health of the community, representing the outcomes of all the factors that shape our health.
