4. Deaths

Identifying and definitional attributes

Item type:	Framework Dimension
METEOR identifier:	721652
Description:	It is important to examine trends and patterns in life expectancy, mortality rates in infants and children, deaths due to suicide and major causes of death. This can help evaluate health strategies and guide policy-making. Examining causes of death provides further insight into the events contributing to deaths, reflecting changes in behaviours, exposures to disease or injury, social and environmental circumstances, data coding practices as well as impacts of medical and technological advances.
