Domain 4 – Health system context

Identifying and definitional attributes

Item type: Framework Dimension

METEOR identifier: 721653

Description: This domain reflects the importance of broad contextual issues of demographics, community and social capital, governance and structure, financing, workforce and infrastructure. It also includes issues of information, research and evidence to influence decisions and actions at all levels and across all sectors. These issues provide essential context for current decisions at all levels and are key issues for the planning of a sustainable health system.

Indicators within this domain will be included in future releases of the AHPF.
