Hospital—hospital identifier, XXXXX

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Hospital identifier
METEOR identifier:	722233
Registration status:	Health , Standard 16/01/2020
Definition:	A unique identifier for a hospital, as represented by a combination of numeric and/or alphabetic characters.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Hospital—hospital identifier
METEOR identifier:	404245
Registration status:	Commonwealth Department of Health , Retired 19/10/2023 Health , Standard 07/12/2011 Independent Hospital Pricing Authority , Qualified 23/11/2015
Definition:	A unique identifier for a hospital.
Object class:	Hospital
Property:	Hospital identifier

Value domain attributes

Identifying and definitional attributes

Value domain:	Identifier XXXXX
METEOR identifier:	404241
Registration status:	Health , Standard 07/12/2011 Independent Hospital Pricing Authority , Qualified 23/11/2015
Definition:	A combination of numeric and/or alphabetic characters that identify an entity.

Representational attributes

Representation class:	Identifier
Data type:	String
Format:	XXXXX
Maximum character length:	5

Data element attributes

Collection and usage attributes

Guide for use:

The complete identifier string, including State/Territory identifier, Region identifier, Organisation identifier and Hospital identifier, should be a unique code for the hospital in that state/territory.

The management of mental health services across a jurisdiction or area may result in a number of separate *Specialised mental health service organisations* reporting various mental health service units from a single hospital entity. In these cases, the Hospital identifier should be identical across all entries for the same hospital, within the same jurisdiction, regardless of the overarching organisational reporting structure.

The Hospital identifier should be identical to the Organisation identifier component, of the *Establishment—organisation identifier (Australian)* reported to the Local Hospital Networks/Public hospital establishments NMDS.

A *Specialised mental health service organisation* may consist of one or more clusters of service units providing services in admitted patient, residential and ambulatory settings. For example, a *Specialised mental health service organisation* may consist of several hospitals (clusters of admitted patient service units) and/or ambulatory or residential service unit clusters (for example, a cluster of child and adolescent ambulatory service units, and a cluster of aged residential service units).

To allow service units to be individually identified, but still also to be identified as part of a hospital (for the admitted patient service setting), or as part of another type of cluster (e.g., other cluster types for ambulatory or residential service settings), a separate reporting level called *Hospital* for admitted patient service units and *Service unit cluster* for ambulatory service units and residential service units is necessary.

The concept of hospital only applies to admitted service units. The equivalent entity for the grouping of ambulatory and residential service units is cluster.

Where applicable, service unit reporting structures should be identical between all mental health collections (e.g., Mental Health National Minimum Data Sets and the Mental Health National Outcomes and Casemix Collection (NOCC)).

Implementation start date: 01/07/2023

Implementation end date: 30/06/2024

Conditional obligation:

For use in the National Outcomes and Casemix Collection (NOCC), this data element applies when the service provision setting is [Admitted patient mental health care service](#).

Data must be collected for either this data element or [Establishment—service unit cluster identifier, XXXXX](#).

DSS specific information:

For use in the National Outcomes and Casemix Collection (NOCC), for admitted patient service units, the hospital cluster identifier should be identical to that used to identify the hospital to which the service unit belongs. For ambulatory and residential services units, where there is no service unit cluster, the hospital identifier is to be reported as "00000" and the hospital cluster would use the relevant organisation name.
