Specialised mental health service—residential service unit name, text XXX[X(97)]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Residential mental health service unit name
METEOR identifier:	722715
Registration status:	Health , Standard 16/01/2020
Definition:	The appellation by which a specialised mental health residential service unit is known or called, as represented by text.
Data Element Concept:	Specialised mental health service—residential service unit name
Value Domain:	Text XXX[X(97)]

Value domain attributes

Representational attributes

Representation class:	Text
Data type:	String
Format:	XXX[X(97)]
Maximum character length:	100

Data element attributes

Collection and usage attributes

Guide for use:	<p>For the residential service setting, as a minimum, 24-hour staffed residential services that employ mental health trained staff on-site 24 hours per day and other services with less intensive staffing (but the trained staff on-site for a minimum of 6 hours a day and at least 50 hours per week) should be defined as separate service units. This applies to both government-operated residential services and government-funded residential services operated by non-government organisations. In addition, residential service units should be differentiated by target population. Residential services would be separately identifiable as service units using the Specialised mental health service—target population group, code N data element. For additional information, please refer to the glossary item Residential mental health care service.</p> <p>The Residential service unit name should be unique for the service unit in that state/territory. Service unit reporting structures should be identical between all mental health collections (e.g., Mental Health National Minimum Data Sets and the Mental Health National Outcomes and Casemix Collection (NOCC)).</p>

Conditional obligation:

For use in the National Outcomes and Casemix Collection (NOCC), this data element applies when the service provision setting is [Residential mental health care service](#).

Data must be collected for either this data element or one of [Specialised mental health service—admitted patient service unit name, text XXX\[X\(97\)\]](#) or [Specialised mental health service—ambulatory service unit name, text XXX\[X\(97\)\]](#).

DSS specific information:

For use in the National Outcomes and Casemix Collection (NOCC), residential service units should be differentiated by target population (general, older persons, child and adolescent, youth, and forensic). Where possible, it is also desirable that residential service units identified in NOCC data correspond directly on a one-to-one basis to those reported in the [Residential mental health care NMDS 2023–24](#).
