**Comments:**

Most recent data available for the 2021 National Healthcare Agreement performance reporting: 2019–20.

From 1 July 2019, the Aged Care Quality Standards (the Standards) introduced a single set of quality standards for the aged care sector. The eight Standards are comprised of 42 Standards requirements. The Aged Care Quality and Safety Commission conducts compliance monitoring and performance assessments against these Standards. Site audits and review audits will include an assessment of the facility against all 42 Standards requirements while an assessment contact can cover a subset of those 42 Standards requirements.

Non-compliance in this context indicates that the facility:

- has not met one or more Standards requirements.

Summary national and state/territory data appear in the annual report of the ACQSC are also published in the annual Report on Government Services.
