# Non-admitted service type code (Tier 2 v6.0) NN.NN

## Identifying and definitional attributes

<b>Metadata item type:</b>	Value Domain
<b>METEOR identifier:</b>	727711
<b>Registration status:</b>	<a href="#">Health</a> , Superseded 05/02/2021
<b>Definition:</b>	The Tier 2 Non-Admitted Services (version 6.0) code set representing the type of service through which a hospital provides health care in a non-admitted setting.

## Representational attributes

<b>Representation class:</b>	Code
<b>Data type:</b>	Number
<b>Format:</b>	NN.NN
<b>Maximum character length:</b>	4

## Collection and usage attributes

<b>Guide for use:</b>	The code set is based on the list and definitions outlined in the document: Tier 2 Non-Admitted Services Definitions Manual (version 6.0).  In April 2020, the list was updated to include codes supporting services related to coronavirus disease (COVID-19).

## Classification scheme attributes

<b>Classification scheme:</b>	<a href="#">Tier 2 Non-Admitted Services classification (version 6.0)</a>
<b>Synonymous names:</b>	Tier 2 v6.0
<b>METEOR identifier:</b>	727708

<b>Definition:</b>	A classification for non-admitted patient service events based on the type and specialty of the health-care professional providing the service and the nature of the non-admitted service.
<b>Registration status:</b>	<a href="#">Health</a> , Superseded 05/02/2021
<b>Context:</b>	<p>A list of outpatient clinics was developed in 1997–98 as an outcome of the Developmental Ambulatory Classification Study conducted by the National Hospital Cost Data Collection (NHCDC).</p> <p>During 2011, the list was updated to accommodate the increase in services that were previously provided to inpatients being undertaken as outpatient services. This also included a full review of the classification in response to the National Health Reform Agreement 2011, which provided for the introduction of a national activity based funding (ABF) system. The aim was to develop a classification system for use with non-admitted services for ABF purposes.</p> <p>The classification has been reviewed regularly from 2012–19 to ensure the classification's relevance and ability to meet the needs of the users.</p> <p>In April 2020, the list was updated to include codes supporting services related to coronavirus disease (COVID-19).</p>
<b>Classification structure:</b>	<p>Tier 2 classes provide a consistent framework for counting non-admitted service events. They are based on an assessment of both the type and specialty of the health-care professional providing the service and the nature of the service provided. This has resulted in a number of classes that is sufficient to ensure clinical meaningfulness and exclusivity across the spectrum of non-admitted services.</p> <p>The classes are also grouped into a number of categories that reflects the type of service provided and the health-care professionals that typically provide the service. The classes are grouped into four categories, as follows:</p> <ul style="list-style-type: none"> <li>• procedures</li> <li>• medical consultation</li> <li>• stand-alone diagnostic</li> <li>• allied health/clinical nurse specialist intervention.</li> </ul>
