Comments:

Most recent data available for 2020 Australian Health Performance Framework reporting: Aggregated data 2016–2018.

Deaths registered in 2015 and earlier are based on the final version of cause of death data; deaths registered in 2016 are based on the revised version; and deaths registered in 2017 and 2018 are based on the preliminary version. Revised and preliminary versions are subject to further revision by the Australian Bureau of Statistics (ABS).

A number of updates to the ICD-10 were applied to 2013 and subsequent years causes of death data. Details of the impact of these changes on the mortality data are described in ABS Implementation of Iris Software: Understanding Coding and Process Improvements.

Prior to 2013, mortality data were coded using ICD-10 2006 version. 2013 data were coded using ICD-10 2013 version; 2014–2017 data were coded using ICD-10 2015 version; 2018 data were coded using ICD-10 2016 version.

Three year combined data are reported for national and sub-national disaggregations.

Estimated Residential Population (ERP) for total population is sourced from ABS ERP at 30 June.

Data by remoteness may be available, pending assessment of data quality.
