Australian Health Performance Framework: PI 2.2.1– Adverse events treated in hospitals, 2020

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	AHPF PI 2.2.1–Adverse events treated in hospitals, 2020
METEOR identifier:	728339
Registration status:	Health , Standard 13/10/2021
Description:	The number of hospitalisations involving an adverse event. Presented as a number per 100 hospitalisations.
Indicator set:	Australian Health Performance Framework, 2020 Health , Superseded 11/07/2023

Collection and usage attributes

Computation description:	<p>Adverse events are defined as incidents in which harm resulted to a person receiving health care. They include infections, falls resulting in injuries, and problems with medication and medical devices. Some adverse events may be preventable.</p> <p>The current measure for this indicator can be interpreted as representing selected adverse events in health care that have resulted in, or have affected, hospital admissions, rather than all adverse events that occurred in hospitals.</p> <p>A hospital separation may be recorded against more than one adverse event category as some adverse events are reported as diagnoses and others as external causes or places of occurrence (of the injury or poisoning). Some of the adverse events may represent events that occurred before admission.</p> <p>Analysis by state and territory is based on location of the service.</p> <p>Presented as a number per 100 separations.</p>
Computation:	$100 \times (\text{Numerator} \div \text{Denominator})$

Numerator:

Number of hospital separations with an adverse event, where an adverse event is defined as follows (using ICD-10-AM 10th edition):

External cause of injury and poisoning	
Adverse effects of drugs, medicaments and biological substances	Y40.~ – Y59.~
Misadventures to patients during surgical and medical care	Y60.~ – Y82.~
Procedures causing abnormal reactions / complications	Y83.~ – Y84.~
Other external causes of adverse events	Y88.~, Y95.~
Place of occurrence of injury and poisoning	
Place of occurrence: Health service area	Y92.23, Y92.24 (a separation with both codes counts as two separations with adverse events)
Diagnoses	
Selected post-procedural disorders	E89.~, G97.~, H59.~, H95.~, I97.~, J95.~, K91.~, M96.~, N99.~
Haemorrhage and haematoma complicating a procedure	T81.0
Infection following a procedure	T81.4
Complications of internal prosthetic devices	T82.~ – T85.~
Other diagnoses of complications of medical and surgical care	T80.~ – T81.~ (excluding T81.0, T81.4), T86.~, T87.~, T88.~, T98.3

Disaggregation:

2018–19—National.

Nationally, by (all not reported):

- adverse event category
- Indigenous status
- remoteness (Australian Statistical Geography Standard (ASGS) Remoteness Structure)
- Socio-Economic Indexes for Areas (SEIFA) Index of Relative Socio-Economic Disadvantage (IRSD) deciles.

State and territory (not reported).

State and territory, by (all not reported):

- adverse event category
- Indigenous status
- remoteness (ASGS Remoteness Structure)
- SEIFA IRSD quintiles.

Some disaggregations may result in numbers too small for publication.

Guide for use

Used for disaggregation by remoteness area and SEIFA IRSD

Comments:

Most recent data available for Australian Health Performance Framework: 2018–19.

From 2017–18 the specificity of *Place of occurrence: Health service area* has improved in that adverse events in the current or another health service area are now separately identifiable. Separations with an adverse event in both the current and another health service area are now counted as two separations with adverse events, and consequently the number and rates of separations with *Place of occurrence: Health service area* may have increased for 2017–18 and subsequent years compared with previous years.

The scope of the National Hospital Morbidity Database (NHMD) is episodes of care for admitted patients in essentially all hospitals in Australia, including public and private acute and psychiatric hospitals, free-standing day hospital facilities, alcohol and drug treatment hospitals and dental hospitals.
