# Australian Health Performance Framework: PI 3.1.2– Incidence of selected cancers, 2020

# Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	AHPF PI 3.1.2-Incidence of selected cancers, 2020
METEOR identifier:	728385
Registration status:	Health, Standard 13/10/2021
Description:	Incidence of selected cancers of public health importance.
Indicator set:	Australian Health Performance Framework, 2020 Health, Superseded 11/07/2023

# Collection and usage attributes

Computation description:	Rates directly age-standardised to the 2001 Australian Standard Population.	
	Analyses by state and territory, remoteness and Socio-Economic Indexes for Areas (SEIFA) Index of Relative Socio-Economic Disadvantage (IRSD) are based on the state or territory and Statistical Area Level 2 (SA2) of the person at the time of their diagnosis.	
	Rates that are considered unstable and should be interpreted with caution will be noted. Rates that are considered very unstable will not be published.	
	Presented as:	
	<ul> <li>a number (for state and territory by cancer type disaggregations)</li> <li>per 100,000.</li> </ul>	
Computation:	100,000 × (Numerator ÷ Denominator)	
	Calculated separately for each type of cancer.	
Numerator:	For melanoma, bowel and lung cancer: Number of new cases in the reported year.	
	For cervical and breast cancer in females: Number of new cases in females in the reported year.	

#### -Data Element / Data Set

Person with cancer—primary site of cancer, topography code (ICD-O-3) ANN.N

Data Source
