National Core Maternity Indicators: PI 01–Tobacco smoking in pregnancy for all females giving birth, 2020

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Common name:	Tobacco smoking in pregnancy
Short name:	PI 01–Tobacco smoking in pregnancy for all females giving birth, 2020
METEOR identifier:	728588
Registration status:	Health , Superseded 17/12/2021
Description:	Among all females who gave birth, the proportion who (a) reported smoking tobacco in the first 20 weeks of pregnancy, and (b) reported smoking tobacco after the first 20 weeks of pregnancy and reported smoking at any time during pregnancy.
Rationale:	This outcome indicator is used to monitor public health.
Indicator set:	National Core Maternity Indicators, 2020 Health , Superseded 17/12/2021

Collection and usage attributes

Computation description:	<p>(a) The number of females who gave birth and reported smoking in the first 20 weeks of pregnancy, divided by the total number of females who gave birth with a known smoking status in the first 20 weeks of pregnancy, and multiplied by 100.</p> <p>(b) The number of females who gave birth and reported smoking after the first 20 weeks of pregnancy, divided by the total number of females who gave birth and reported smoking during pregnancy, and multiplied by 100.</p> <p>A birth is defined as the complete expulsion or extraction from a female, of a product of conception of 20 or more completed weeks of gestation or of 400 grams or more birthweight.</p> <p>Smoking refers to the use of cigarettes or inhaled tobacco.</p>
Computation:	$100 \times (\text{Numerator} \div \text{Denominator})$
Numerator:	<p>(a) The number of females who gave birth and reported smoking tobacco in the first 20 weeks of pregnancy.</p> <p>(b) The number of females who gave birth and reported smoking tobacco after the first 20 weeks of pregnancy.</p>

Disaggregation:

- Year of birth
- State or territory of birth
- Mother's age at birth
- Hospital annual number of births
- Hospital sector
- Indigenous status of mother
- Remoteness category (from mother's area of usual residence)
- Disadvantage quintile (from mother's area of usual residence)
- Primary Health Network (from mother's area of usual residence)
- Statistical local area 3 (from mother's area of usual residence)

Comments:

Data elements are from the Perinatal National Minimum Data Set (NMDS) or have been provided as voluntary non-standardised items by the states and territories. Records with a permissible value have been included in the denominator.

Standardised data collection for smoking in pregnancy commenced for births from July 2010. This will enable reporting against parts (a) among all females who gave birth the proportion who reported smoking tobacco in the first 20 weeks of pregnancy, and (b) among all females who gave birth the proportion who reported smoking after 20 weeks of pregnancy and reported smoking at any time during pregnancy.

National Perinatal Data Collection (NPDC) data on smoking status and/or smoking quantity (number of cigarettes smoked) have been collected from New South Wales, Queensland, South Australia, and Australian Capital Territory since 2001, and progressively from all other jurisdictions.

Representational attributes
