National Core Maternity Indicators: PI 06–Caesarean section for selected females giving birth for the first time, 2020

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Common name:	Caesarean section for selected females giving birth for the first time
Short name:	PI 06–Caesarean section for selected females giving birth for the first time, 2020
METEOR identifier:	728723
Registration status:	Health, Superseded 17/12/2021
Description:	The proportion of selected females giving birth for the first time who gave birth by caesarean section.
Rationale:	This indicator is used to benchmark practice.
Indicator set:	National Core Maternity Indicators, 2020 Health, Superseded 17/12/2021

Collection and usage attributes

Population group age from:	20 years
Population group age to:	34 years
Computation description:	The number of selected females giving birth for the first time who gave birth by caesarean section, divided by all selected females, and multiplied by 100.
	Selected females criteria: Females included are those who gave birth for the first time and met all of the following criteria:
	 aged between 20 and 34 gestational age at birth between 37 and 41 completed weeks pregnancy has one baby only (singleton) the presentation of the baby is vertex (baby's head was at the cervix)
	Excluded are those females who have given birth prior to the current birth or who did not meet the selected females criteria.
	A birth is defined as the complete expulsion or extraction from a female, of a product of conception of 20 or more completed weeks of gestation or of 400 grams or more birthweight.
	Caesarean section is an operative procedure to remove the baby through an incision through a female's abdomen and uterus.
	Gestational age is a clinical measure of the duration of the pregnancy. For the National Perinatal Data Collection gestational age is reported as completed weeks.
Computation:	100 × (Numerator ÷ Denominator)
Numerator:	The number of selected females giving birth for the first time who gave birth by caesarean section.
Numerator data elements:	Data Element / Data Set
	Person-date of birth, DDMMYYYY
	Data Source
	Perinatal National Minimum Data Set (NMDS)

Comments:

Data elements are from the Perinatal National Minimum Data Set (NMDS) or have been provided as voluntary non-standardised items by the states and territories. Records with a permissible value have been included in the denominator.

For Tasmania from 2004 to 2012, presentations via caesarean births were not reported by hospital still using paper-based form. Where a caesarean section occurred the presentation was recorded as 'Not stated'. Presentations via caesarean births was included in the paper-based form from 1 January 2013. As a result, Tasmania can only be reported 2013 onwards for selected females.

Data for parity, a criteria to selected females, were not available from Victoria in 2009.

Patient election status is available from all jurisdictions from 2006.

Source of definition: Australian Council on Healthcare Standards (ACHS) Indicator 1.4: Selected women giving birth for the first time undergoing caesarean section. This ACHS indicator is based on the definition by Women's Healthcare Australasia Core Maternity Indicators Project (WHA 2007).
