Female—cervical screening indicator, yes/no/not stated/inadequately described code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Cervical screening indicator
Synonymous names:	HPV test indicator; Human papillomavirus test indicator
METEOR identifier:	731925
Registration status:	Indigenous , Standard 14/07/2021
Definition:	An indicator of whether a female person has had a cervical screening (HPV) test, as represented by a code.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Female—cervical screening indicator
METEOR identifier:	358915
Registration status:	Health , Standard 25/08/2011 Indigenous , Standard 13/03/2015
Definition:	An indicator of whether a female person has had a cervical screening.
Object class:	Female
Property:	Cervical screening indicator

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare
--------------------------	--

Value domain attributes

Identifying and definitional attributes

Value domain:	Yes/no/not stated/inadequately described code N
METEOR identifier:	301747
Registration status:	Australian Teacher Workforce Data Oversight Board , Recorded 25/10/2022 Children and Families , Standard 22/11/2016 Community Services (retired) , Standard 14/02/2006 Disability , Standard 07/10/2014 Early Childhood , Standard 21/05/2010 Health , Standard 21/09/2005 Homelessness , Standard 23/08/2010 Housing assistance , Standard 10/02/2006 Independent Hospital Pricing Authority , Standard 01/11/2012 Indigenous , Standard 13/03/2015 Tasmanian Health , Standard 08/11/2023
Definition:	A code set representing 'yes', 'no' and 'not stated/inadequately described'.

Representational attributes

Representation class:	Code
Data type:	Boolean

Format:	N	
Maximum character length:	1	
	Value	Meaning
Permissible values:	1	Yes
	2	No
Supplementary values:	9	Not stated/inadequately described

Collection and usage attributes

Guide for use: CODE 9 Not stated/inadequately described
This code is not for use in primary data collections.

Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare

Data element attributes

Collection and usage attributes

Comments: From 1 December 2017, the screening test for cervical cancer, the Pap test, changed to a test for the human papillomavirus (HPV) with partial HPV genotyping and reflex liquid-based cytology (LBC) triage. The procedure for collecting samples for HPV testing is the same as for having a Pap smear. A health-care professional will take a small sample of cells from the woman's cervix. The sample will be sent to a pathology laboratory for examination. The previous Pap test could detect abnormal cell changes, however the new cervical screening test detects the HPV infection that can cause the abnormal cell changes, prior to the development of cancer. The recommended screening age for the HPV test is 25 to 74 years. The HPV test will be offered every 5 years (DoH 2017). A vaginal sample can also be taken by a woman, under supervision of her health-care professional (AIHW 2017).

Implementation in Data Set Specifications: [Aboriginal and Torres Strait Islander specific primary health care NBEDS December 2023](#)

[Indigenous](#), Standard 25/02/2024
Implementation start date: 01/07/2023
Implementation end date: 31/12/2023
Conditional obligation:

Reporting against this data element is conditional on:

- a 'CODE 2 Female' response to [Person—sex, code X](#), and
- a 'CODE 2 No' response to [Female—hysterectomy indicator, yes/no code N](#), and
- [Person—age, total years N\[NN\]](#) being ≥ 25 years and < 75 years at the census date.

DSS specific information:

In the ATSI SPHC NBEDS only aggregated data with 'CODE 1 Yes' are provided to the AIHW.

In the ATSI SPHC NBEDS data are provided to the AIHW for female [First Nations regular clients](#) aged 25–74, who have not had a hysterectomy, and who have had a cervical screening (human papillomavirus (HPV)) test within the 5 years up to the census date.

Data are recorded for HPV test results where the sample is either collected by a health practitioner or self-collected.
