Person—reason for opting off a disease screening program, code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Reason for opting off a disease screening program
METEOR identifier:	732523
Registration status:	Health , Standard 05/02/2021
Definition:	The reason why the person opts off a disease screening program, as represented by a code.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Person—reason for opting off a disease screening program
METEOR identifier:	568084
Registration status:	Health , Standard 29/08/2014
Definition:	The reason why the person opts off a disease screening program.
Object class:	Person
Property:	Reason for opting off a disease screening program

Value domain attributes

Identifying and definitional attributes

Value domain:	Reason for opting off a disease screening program code N
METEOR identifier:	568079
Registration status:	Health , Standard 29/08/2014
Definition:	A code set representing reasons for opting off a disease screening program.

Representational attributes

Representation class:	Code
Data type:	Number
Format:	N
Maximum character length:	1

	Value	Meaning
Permissible values:	1	Already having cancer surveillance
	2	Having regular colonoscopy
	3	Having regular screening
	4	Medical advice not to participate
	5	Uncomfortable with process
	6	Privacy concerns
	7	Not interested

	8	Other
Supplementary values:	9	Not stated/inadequately described

Data element attributes

Collection and usage attributes

Guide for use: Record the reason for opting off a disease screening program.
Information on why participants are opting off disease screening could help improve disease screening programs.
