# Management of Peripheral Intravenous Catheters

## Clinical Care Standard: 04a-Evidence of local arrangements that provide systematic support for decisions related to the selection of an appropriate PIVC device

### Identifying and definitional attributes

<b>Metadata item type:</b>	Indicator
<b>Indicator type:</b>	Indicator
<b>Short name:</b>	4a-Evidence of local arrangements that provide systematic support for decisions related to the selection of an appropriate PIVC device
<b>METEOR identifier:</b>	733358
<b>Registration status:</b>	<a href="#">Australian Commission on Safety and Quality in Health Care, Standard 25/05/2021</a>
<b>Description:</b>	Evidence of local arrangements that provide systematic support for decisions related to the selection of an appropriate PIVC device.
<b>Rationale:</b>	An appropriate PIVC should be selected and inserted in a suitable site to minimise the risk of failure and other device-related complications.
<b>Indicator set:</b>	<a href="#">Clinical care standard indicators: Management of Peripheral Intravenous Catheters</a> <a href="#">Australian Commission on Safety and Quality in Health Care, Standard 25/05/2021</a>

### Collection and usage attributes

<b>Computation description:</b>	<p>A local arrangement is a written policy, protocol, and/or algorithm that provides systematic decision support for device selection.</p> <p>Examples of available tools include:</p> <ul style="list-style-type: none"><li>• Michigan Appropriateness Guide for Intravenous Catheters (MAGIC)</li><li>• MiniMAGIC.</li></ul>
<b>Computation:</b>	<p>Yes/No</p> <p>A healthcare setting that has documented evidence of a locally approved policy that is implemented should record 'Yes.' Otherwise, the healthcare setting should record 'No.'</p>

### Representational attributes

<b>Representation class:</b>	Count
<b>Data type:</b>	Real
<b>Unit of measure:</b>	Service event
<b>Format:</b>	Yes/No
