Data element attributes

Collection and usage attributes

Guide for use:

Antenatal screening for mental health risk is conducted using a validated screening tool, which is an instrument that has been psychometrically tested for reliability, validity and sensitivity. For example the Edinburgh Postnatal Depression Scale (EPDS).

CODE 1 Yes

This value should be used if the female was screened using a validated screening tool.

CODE 2 Not offered

This value should be used if the female was not offered screening using a validated screening tool.

CODE 3 Declined

Screening for mental health risk was declined by the female.
